Dear Hiring Manager,

Please find enclosed my CV as part of my application for the BJSS Engineering Academy June 2023, as advertised on the company's website.

As a former pharmacist, I faced the challenging circumstances of the Covid-19 pandemic and decided to pivot my career towards technology. I embarked on a self-learning journey a year ago, using Udemy courses and online resources to learn JavaScript. Since then, I have taken my skills to the next level by enrolling in the highly competitive School of Code Web Development (JavaScript) bootcamp, where only three percent of four thousand applicants were accepted.

The experience was both challenging and rewarding, and I am now proficient in developing full-stack React applications with RESTful APIs using Node.js, Express, relational databases (PostgreSQL), and Firebase Authentication.

I have also gained experience in software testing using Postman, Jest, and React Testing Library, as well as automated testing with Cypress. Working in agile, multidisciplinary teams has taught me how to collaborate effectively to build web applications that address real-world problems.

I am excited about the Engineer Academy programme at BJSS because it presents an excellent opportunity for me to gain hands-on experience with a wide range of technologies and industries. I am eager to develop my skills and gain a deeper understanding of the different roles within engineering. I believe that my passion for technology, combined with my strong work ethic and ability to collaborate effectively, would make me a valuable addition to your team.

Thank you for taking the time to consider my application. I very much look forward to hearing from you in the near future.

Sincerely,

Beatrice Stanila
