Projects

AMIGO - A Travel Platform for Exploring Lesser-Known Destinations.   Demo 🔗 | GitHub Repo 🔗

- This project was built during the last month of the School of Code bootcamp, in a team of 6 people.
- My contribution was by working on multiple aspects of the development process including the ideation, the database, the frontend, authentication features, testing, deploying, and styling.

JavaScript | Next | PostgreSQL | Node | Express | Netlify Firebase Auth | Axios | TailwindCSS |OpenTripMap API

FLASH - The Ultimate App for Bootcamp Graduates' Interview Preparation.   Demo 🔗 | GitHub Repo 🔗

- During week 9 of the bootcamp, our team of four collaborated to design an app that aids bootcampers and other individuals in preparing for job interviews.
- Throughout the project, I focused primarily on frontend development, utilizing React to enhance my proficiency with the library.

JavaScript | React| PostgreSQL | Node | Express | Render Axios | Jest & Supertest | Postman | CSS Modules

Work Experience

Pharmacovigilance Specialist, ProPharma Group - Remote, UK   02/2022 - 09/2022

- Wrote comprehensive Nuvaxovid vaccine narrative reports and presented them to stakeholders.
- Meticulously carried out daily case processing for reported adverse events, including information gathering during follow-up calls, as well as written communications to obtain further details.

Pharmacy Assistant, Boots - Coventry, UK   03/2020- 01/2022

- As the Patient Safety Champion, I worked closely with the team to ensure that each patient received the best possible care and that any potential risks were identified and addressed on time.
- Provided individualized advice that enabled customers to make well-informed decisions about their healthcare needs.

Interests

- Future Technologies: Redux, TypeScript, Python, AWS, Codewars.
- Travelling - participated in the USA Work & Travel programme.
- Fitness (gym, social dancing, hiking, ice-skating) | Formula 1 | Literature | Languages.
